

# XJY-302 Series Silicone Pressure Sensitive Adhesive

## PRODUCT INTRODUCTION

XJY-302 series SPSA is a kind of pressure sensitive adhesive with platinum catalytic system. It is colorless, transparent and viscous liquid, with high peeling force and high temperature resistance. This glue can be used for all kinds of adhesive tapes, with good aging resistance, and is suitable for low peeling force application of protective film.

## PRODUCT FEATURES

- Excellent chemical corrosion, UV resistance, weather resistance;
- Good adhesion, can be used in protective film tape;

## PRODUCT PROPERTY

Product Property	XJY-302-3	XJY-302-5	XJY-302-7	XJY-302-9
Appearance	Colorless transparent liquid			
Solid Content	58-62%			
Solvent	Toluene			
Peel Force	800 g/inch	1200 g/inch	10 g/inch	3 g/inch
Typical Application	Protective film tape			
Curing System	Platinum			

## INSTRUCTIONS FOR USE

- Before the glue is applied, add the main agent in proportion, and add the diluent, cross-linking agent, anchoring agent, platinum catalyst, etc. in sequence. The solid content of the glue can be adjusted according to the coating thickness requirements. Generally, it is recommended to use ethyl acetate to dilute to 20-35% solid content;
- After the glue is prepared, the storage time should not be long to avoid the glue reacting during storage;

## PACKAGING, STORAGE, TRANSPORTATION

XJY-302 series can provide 200Kg inner coated iron drum. If you have special requirements, you can negotiate and customize.

This product is stored in the original unopened packaging, when the storage temperature is 25C and below, the validity period of this product is 12 months from the production date. If the storage period is exceeded, the product should be re-tested, and it can still be used if it meets the quality requirements.

## PRECAUTIONS

- ◆ The PH value of this series of products is near neutral. If you accidentally touch the skin or eyes, please rinse with plenty of water and go to the hospital for treatment;
- ◆ This product has not been tested or stated as suitable for medical or medicinal use;
- ◆ This information does not include the required product safety information, please read the product description before use;
